Rogers Fencing Supplies Ltd Axis Perimeter Fence system offers crimped panels reinforced for greater rigidity with its specially profiled posts, giving it a sleek contemporary appearance ideal for commercial and school applications.

The unique no bolts & no screws fixing system allows the panel to attach directly into the purpose made grooves every 100mm along the full length of the post, making it impossible to remove a full panel once installed. The system can be used in a wide range of applications from commercial sites where the corporate identity can be easily reflected in the perimeter fence by matching colours of buildings, display signs and logos, to schools where the no bolt system provides children with a protective yet bright and non-threatening environment. Rogers Fencing Axis system can also be used to harmonise with existing landscape conditions in gardens and parks making it an ideal security product.
